Finding aid for
Technology Opportunities Program Data Archive,
1994-2005

Finding aid created by
Kate Williams, Rebecca Bizonet, Jennifer Hill, Ursula Arnold, 2006Encoded finding aid prepared by:
Greg Kinney, 2006

Summary Information

**Title:** Technology Opportunities Program Data Archive  
**Creator:** Technology Opportunities Program  
**Inclusive dates:** 1994-2005  
**Extent:** 16 linear feet (16 boxes)  
**Abstract:**
Federal program to promote the use of information and communications technologies (ICTs) by providing matching grants to community based organizations to help them use or provide telecommunications for new opportunities, especially for unserved or under-served groups. Records include project proposals, reports, sound and video recordings relating to individual projects, websites and other digital records.

**Call number:** Power - TOP  
**Language:** The material is in English  
**Repository:** Special Collections Library, University of Michigan

Access and Use

**Access Information:**
The collection was acquired from the Technology Opportunities Program of the U.S. Dept. of Commerce in 2005.

**Access Restrictions:**
The records are open for research with a few exceptions. Access has been restricted to a small number of documents in the TOP collection due to privacy and legal concerns. The restrictions are as follows: Box 8, Project Reporting System confidential reports are restricted to researchers who can demonstrate that they are working within the bounds of a research project which has been approved by the Institutional Review Board of their university or other research institution.

**Copyright:**
Permission to publish material from this collection must be obtained from the University of Michigan Special Collections Library and the individual copyright holder.
Processing Information:

An excel spreadsheet accompanies this finding aid. It was created to enable users to do a virtual sort of the collection and more easily draw out information of interest. The excel spreadsheet provides the same information as in the listing below, with three additions. First, every folder of paper or every multimedia item is given a number. Second, items from TOP projects are each identified by a UM ID ranging from 1 to 606. This ID was created at UM as an identifier shorter than the nine digit grant numbers assigned by TOP when the projects originated. Third, for the Video Recordings series, the spreadsheet includes almost-verbatim text from the video cases and any additional observations from viewing a small number of tapes.

Preferred Citation:

[Item title, folder title, box no.], Technology Opportunities Program Data Archive, Special Collections Library, University of Michigan

Arrangement

Summary Contents List

1. Project Documents -- Boxes 3-7
2. Project Reporting System -- Box 8
3. Project CDs -- Box 9 (boxes 9A-9B)
4. Project Floppy Disks -- Box 9 (box 9B)
5. Project Cassette Tapes -- Box 9 (box 9C)
6. TOP and NTIA -- Box 9 (box 9C)
7. Video Recordings -- Boxes 10-16

History

Congress established the Technology Opportunities Program (TOP) in 1994 as a part of the National Telecommunications and Information Administration (NTIA) in the Department of Commerce. The name of the program at that time was the Telecommunications and Information Infrastructure Assistance Program (TIIAP).[1] TOP was eliminated from the fiscal year 2005 federal budget. This action reduced the staff of the TOP administrative office, but did not interrupt the current projects either in financial terms or in terms of their reporting requirements.[2]

TOP functioned to promote the use of information and communications technologies (ICTs) by providing matching grants to community based organizations to help them use or provide telecommunications for new opportunities, especially for unserved or under-served groups. These organizations covered a wide variety of organizations in the public and non-profit sectors. These included community development groups, state, local and tribal governments, health care providers, school districts, libraries, universities, public safety services, and other non-profit organizations. Between 1994 and 2004, TOP funded 610 grants in 50 states, the U.S. Virgin Islands, Puerto Rico and Washington D.C., totaling $233.5 million, matched by $313.7 million from local communities.[3] (Four of the 610 grants were repeat grants, so TOP funded a total of 606 projects.)

TOP requires a project to focus on measurable outcomes and works with a project to develop these outcomes and certain milestones during the life of the project. Projects are evaluated against these milestones on a quarterly basis and require independent evaluations of the projects. TOP used evaluations in order to promote continual improvement, assessment of short-term impacts, and development indicators of long-range impact. In applying grants, TOP evaluates a project's purpose, innovation, community involvement, evaluation, dissemination, feasibility, budget and future sustainability. Community involvement is an especially important aspect of TOP projects. TOP requires projects to work with partners outside their community. [4]

Collection Scope and Content Note

The TOP Data Archive was initiated in 2004 by the University of Michigan School of Information. In addition to TOP itself, partners include the Community Informatics Initiative at the University of Illinois at Urbana-Champaign Graduate School of Library and Information Science, the Educational Development Corporation, the Interuniversity Consortium for Political and Social Research, and the U of M Special Collections Library.

The TOP Data Archive is distributed, with physical materials in the U-M Special Collections Library and electronic materials online at one or more locations. As of 2006, the electronic materials are still being processed.

This idea behind assembling this data archive was to preserve important records concerning how local communities are entering the digital age, and create a foundational dataset for the emerging field of Community Informatics. This field examines communities and information and communications technology. It emerged in the 1990s from experiments with technology in communities which have been carried out worldwide, at the grassroots level and/or by means of national and international funding initiatives.

The TOP Data Archive includes 1) information assembled in the course of a federal agency managing its projects, 2) that same information re-purposed for research use, and 3) new information brought in for research purposes. The federal agency is the Technology Opportunities Program (TOP) within the National Telecommunications and Information Administration at the U.S. Department of Commerce. TOP funded projects from 1994-2005, and is expected to continue managing already-funded projects into 2007.

The records in the TOP collection--that part of the TOP Data Archive which is in the holdings of the Special Collections Library--represent grant proposals submitted to TOP and project materials created by TOP and its grantee organizations, known as TOP projects, during the period of 1994-2005. The collection is not inclusive of all 606 TOP projects. TOP was able to locate and provide for the collection project documents and Audio/Visual materials for about 88 TOP projects. These were materials that the projects submitted to TOP over the years. The TOP project materials are represented by many different formats, including paper, multimedia compact discs, floppy disks, cassette...
The records of the TOP collection are arranged into eight series: Proposals, Project Documents, Project Reporting System, Project CDs, Project Floppy Disks, Project Cassette Tapes, TOP and NTIA, and Video Recordings.

Subject Terms

- Technological innovations
- Communication in community development
- Media literacy
- Community information services

Subjects:
- Technology Opportunities Program (U.S.)
- Telecommunications and Information Infrastructure Assistance Program (U.S.)
- Information technology -- United States -- 20th century.

Genre Terms:
- Grant proposals
- Documents
- Videotapes

<td><strong>Proposals</strong> [series]:</td>
<td>The Proposals series (boxes 1-2) are grant proposals that organizations submitted to TOP. The notation &quot;App. no&quot; in the finding aid represents the number assigned by TOP to the grant proposals. The 9-digit-plus-letter I notation (nn-nn-Innnnn) in the Proposals series represents the initial grant number assigned to the organization. This initial grant number differs only by the inclusion of the letter I from the grant numbers (nn-nn-nnnnn) in the other series. The grant proposals are not a complete set of the grant proposals submitted to TOP.</td>

Project Documents [series]:
The Project Documents series (boxes 3-7) lists the paper documents of various formats that TOP projects sent to TOP as well as press documents published about TOP and the projects. For this series, the finding aid is organized by TOP grant number followed by the project/organization name and the project's submitted paper documents. The series includes general information sheets about many TOP projects. Many TOP projects created their own newsletters, catalogues and bulletins. The series includes news articles about TOP projects published in newspapers, newsletters, bulletins, and magazines. The TOP projects that created materials to market their resources to their users includes outreach materials, promotional materials, pamphlets, brochures, maps, performance schedules and other print media. Other user documents include a deck of informative playing cards, stickers, magnets and mouse pads. User materials include class schedules, course listings, course materials, website documentation, student workbooks, and user manuals. Those TOP projects that trained employees submitted guidebooks, staff development handbooks, procedural manuals, standard operating procedural documents, preliminary interviews with agency staff and a resume. Many TOP projects created documents to present their ongoing work in various formats: case studies, evaluation studies, scientific papers, and published books. The TOP projects that were art- and culture-related submitted art products such as flipbooks, posters, fans, and photographs. The collection also includes some awards granted to TOP projects. Project results about TOP projects are recorded in program assessment reports, analysis reports, and evaluation reports. The collection includes internal documentation about TOP projects published in meeting agendas, advisory board meeting documents, meeting minutes, and Power Point slide presentations. There are numerous TOP project reports included in the collection: annual reports, interim reports, quarterly reports, final project reports, year-end reports, close-out reports, summary reports, and budget reports.

The Project Reporting System [series]:
The Project Reporting System series (PRS series, box 8) contains documents concerning the PRS, or Project Reporting System. This was a database implemented at TOP in 1998 as a shared repository of reports from TOP project staff and comments from TOP program officers. A later enhancement was known as PRI. When the TOP Data Archive was developed, all partners agreed that these two databases would be important to archive. This involved not only obtaining the data through a Freedom of Information Act process with the Department of Commerce, but extracting it from the proprietary database software it was written in. This extraction was done by Mark Bard working with Francine Jefferson and others at TOP in summer 2005. (Dr. Jefferson managed the creation of the PRS database in the first place.) As of summer 2006, there are plans to extract subsequent data, as TOP's last projects wind down to closing in 2007. In the process of the extraction, TOP made available copies of documents that were part of development and implementation of the PRS database. These are enumerated as 22 different documents in the TOP archive.

A web-based data dictionary was also created. As of summer 2006, TOP Data Archive partners are working to make the data dictionary and the databases themselves (PRS and PVI) available via the data depository at the Interuniversity Consortium for Political and Social Research, accessible to researchers and others. The materials in the PRS series, such as internal staff reports and evaluations and data involving research subjects, are confidential in nature and have been closed for a period of 15 years. The other materials are open for research. (See http://www.si.umich.edu/toparchive for more information.)

In addition to existing in paper format in this collection, items 9 through 15 are expected to be available for researchers electronically once the electronic information is processed; please see http://www.si.umich.edu/toparchive for details.

The PRS files currently available in paper format within the collection are made up of guides for the various reports and users of the original system. Startup reports were done at the start of a project; quarterly were done four times a year, and closeout were done at the end of a project. Program officers and administrators were the TOP staff; grantees were the project staff. More information on these files...
is available in the box listing of this finding aid. Each number represents a file number, which corresponds to a folder. Some file headings include explanatory parenthetical notes added by School of Information principal researcher and U-M/TOP liaison Kate Williams.

PRS documentation for different reports and different users

1. Startup/program officer Restricted
2. Startup/administrator Restricted
3. Startup/grantee Restricted
4. Quarterly/program officer Restricted
5. Quarterly/administrator Restricted
6. Quarterly/grantee Restricted
7. Closeout/program officer Restricted
8. Closeout/grantee Restricted

10. Startup documentation, award 02-60-98045, October 1999 Restricted
11. Startup documentation, award 04-60-98039, October 1999 Restricted
12. Quarterly performance report, award 24-60-00029, February 2001 Restricted
13. Quarterly performance report, award 24-60-00029, April 2001 Restricted
15. Final report, award 02-60-00003, February 2004 Restricted

Other materials on PRS, various dates

16. Field specifications for FEJ survey database

(PR S began as "FEJ survey database," since it was TOP evaluation specialist Francine Jefferson who managed its creation.)
17. Draft TIAAP reporting requirements  
(by the developers of the PRS, references an early mockup of the PRS)

18. Startup documentation  
(references a slightly later version of PRS than item 17)

19. Data dictionary, before Francine Jefferson and Mark Bard added to it in summer 2005  
(Mark was the University of Michigan School of Information masters student who worked on the TOP project and, with a paid summer internship at the Library of Congress, was able to spend time at TOP extracting the PRS from its proprietary format for archiving and research use.)

20. Untitled table identifying reporting periods, data labels, submissions, data quality, and TOP reports  
([Probably was created by Francine Jefferson in summer 2005])

21. PRS draft 1, October 1999  
(a six-page diagram of the PRS database)

22. TOP online grants management data model (a legal-sized page diagram of the PRS database)

Project CDs [series]:
The Project CDs series (boxes 9A and 9B inside box 9) contains CDs created by 25 TOP organizations. Of note among these are numerous CDs submitted by the TOP organization, California Institute of the Arts, and sub-unit Community Arts Partnership, that contain art projects created by the organizations and their students. The Vermont MIDI Project organization produced CDs of the students' musical compilation. The Tribal Virtual Network Blue Ribbon Cutting Ceremony is on a CD. Other items on CDs include Power Point presentations, conference presentations, movies, resources for classes, teaching tutorials, organization activities, radio spots, and grant-writing resources.

The Project Floppy Disks series (box 9B inside box 9) contains floppy disks created by 6 TOP organizations. The floppy disks contain Corel presentations, Power Point presentations, staff development materials, statements of work, final evaluations, and information for students.

**Project Floppy Disks** [series]:
The Project Cassette Tapes series (box 9C inside box 9) contains cassette tapes submitted by 7 TOP organizations. All of the TOP organization cassette tapes contain clips of news radio programs about the individual TOP projects and a few contain interviews with TOP organizers. The series also includes two radio programs that have radio listener call-in segments: an NPR news program about rural hospitals and a radio program produced by Studio 49 in New Mexico, about cyber-sovereignty for Native Americans.

**Project Cassette Tapes** [series]:
The Technology Opportunities Program and National Telecommunication and Information Administration series (or TOP and NTIA series, for short, box 9C inside box 9) is represented by 7 cassette tapes of the NTIA Annual meeting, titled Networks for People, on October 30-31, 2000 at the Hilton Crystal City at the National Airport in Arlington, Virginia. The theme of the Annual meeting is Entrepreneurship, Nonprofits at Internet Speed. The
Technologies Opportunities Program (TOP) cassette tape dates from October 30, 2000 and the topic of the cassette tape is three panelists' perspectives on the evaluation process.

**TOP and NTIA** [series]: The Video Recordings series (boxes 10-16) contains 213 videotapes. The Video Recordings series includes newscasts, videotaped events or conferences, and specially prepared video recordings promoting or documenting a project, technology or theme. 205 tapes came to the archive as VHS recordings, 5 as BetaCams, 2 as DVDs, and one as a
Mini-DV. All of these are in the process of digitization and are expected to be stored in their original formats as well as two new digital formats. More details will be made available about the progress of the digitization project at a later time.

The Video Recordings series is further divided into six subseries: TOP Projects, TOP, Other Government Agency, Public Broadcasting Service, Other and Unknown. All of the videotapes in the Video Recordings series have unique identifiers in the form "Vnnn." In addition, the video recordings in the TOP Projects subseries have unique identifiers associated with their TOP Grant ID Number. TOP Projects contains 124 video recordings, organized by TOP ID. Each videotape in the TOP Projects subseries is also marked with a "UMID" indicating to which TOP project the tape corresponds. The collection contains video recordings from 54 TOP projects; it is possible that more were produced, but not made available to TOP or not located for this archive.

The TOP subseries consists of 18 video recordings created by the Technology Opportunities Program containing speeches by TOP executives and grant announcements. Other Government Agency consists of 18 video recordings related to different government organizations not directly associated with TOP. (Please note that 11 video recordings in this series are copies of the same videotape.) Public Broadcasting Service includes 12 video recordings that are not associated with a TOP project but related to the Corporation for Public Broadcasting and the Public Broadcasting Service. Other is a subseries of 30 video recordings that could not be tied to a TOP Project or placed in any other subseries. This subseries contains two sub-subseries. Unknown is a subseries of 11 video recordings that could not be attributed to an organization or location at time of processing. Users researching a certain TOP project should consider looking through the listing of these last three subseries to see if a particular videotape relates in any way to his or her project.

**Technologies Opportunities Program (TOP) [subseries]:**

Evaluation, October 30, 2000

(3 panelists' perspectives on the evaluation process: Francine Johnson, TOP perspective, How TOP uses the evaluation information you provide, Allison Fine, planning program evaluation, Katherine Dansky, issues about evaluation design)

**National Telecommunication and Information Administration (NTIA) [subseries]:**

Networks for People, Annual meeting, 2000 purpose to share lessons learned in common effort to bring fruits of information age to all Americans. Year's theme: Entrepreneurship, Nonprofits at Internet Speed
